

## Help Guide to Welder Positions

This picture shows the different welder positions for BS EN ISO 9606-1 and ASME IX, see QW-461. A new welder starting at a manufacturer can show evidence of previous codes, but this can't be used by the new manufacturer for welding parts. Their company name will not be on the code certificate, the new welder will have to do another new weld test before welding any product assuming the products need coded welders.

Blue are EN ISO 9606

RED are ASME IX
